GARDEN MUM CARE SHEET

We hope you enjoy your garden mums this fall season. Here are some helpful tips to follow this fall so you can enjoy them again next year.

- In late Oct. or early Nov. you want to cover your mum plant with 5-6" of marsh hay or straw. We suggest instead of cutting them back, leave the stems on the plant and mulch right over them. This gives you a better insulation for the winter. In the spring you will want to remove the mulch in early April.
- You don't want to cover too early; the mums need time to harden off. Mums are semi-hardy for Minnesota and following these steps will hopefully give you good results.
