RABBIT RESISTANT PLANTS

No plant is said to be really rabbit proof. Young rabbits investigate by nibbling most plants. They soon learn which plants are tasty and which ones to leave alone.

In general rabbits dislike very aromatic plants, plants that ooze caustic milky sap, prickly plants, plants with spines, or plants with tough leathery leaves.

Aconitum- Monks Hood
Ajuga- Bugleweed
Alcea- Hollyhock
Alchemilla- Lady's Mantle
Amsonia
Anchusa- Alkanet
