BIRCH- CAUSES OF YELLOW LEAVES

Yellow leaves on birch trees can be a sign of several problems:

- Lack of moisture. Birches are shallow rooted trees and require Anywhere from 1 to 3 inches of water per week depending on soil Types (more on sandy, less on clay) and temperatures (more during hot weather, less in cool periods.)
- Iron chlorosis. Birches require a slightly acidic soil. Check the pH Level; ideally birches thrive between 5.5 and 6.5.
